### Benefits of Silostop<sup>®</sup>

- Reduce dry matter loss
- No spoilage to pitch
- Labor saving
- Higher quality feed
- 60x more effective than regular cover

# What is Silostop® Clear 2-step film?

## The Silostop® effect

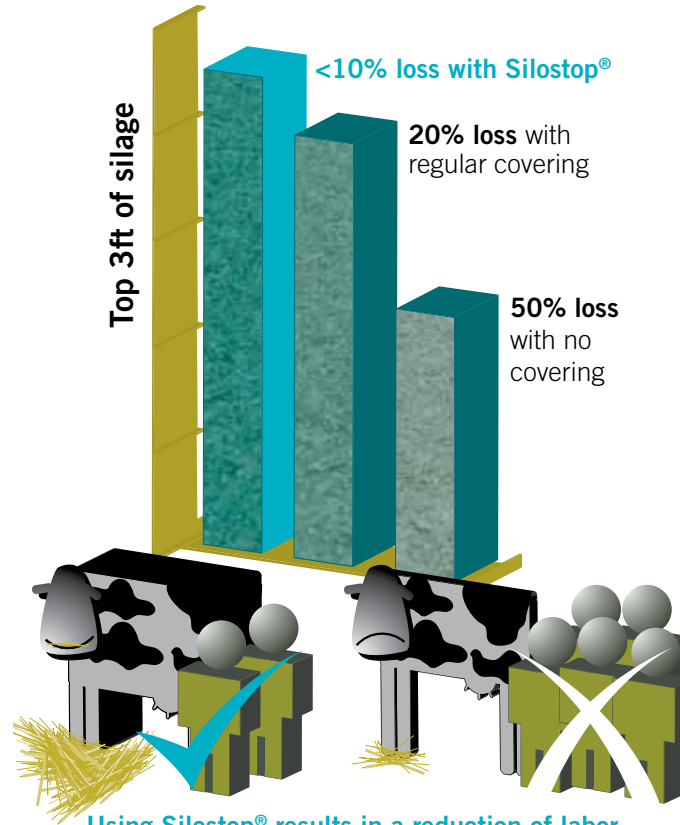

Silostop® Clear 2-step Oxygen Barrier film is a thin (1.8 mil) impermeable film which prevents the entry of oxygen into the silage. It is lightweight, strong, easy to use and cost effective. Use of Silostop® results in minimal silage loss, improved animal intake and animal health.

### Oxygen Transmission Rate (OTR) comparison

Sample	Thickness mil	OTR ASTM D3985 100% O <sub>2</sub> cm <sup>3</sup> /m <sup>2</sup> /24h	OTR DIN 53380-3 21% O <sub>2</sub> cm <sup>3</sup> /m <sup>2</sup> /24h
Regular W/B silage cover	5	2000	400
<b>Silostop® Clear 2-step</b>	<b>1.8</b>	<b>30</b>	<b>3</b>

The table shows that standard independent lab tests prove that Silostop® is at least 60 times more of a barrier to oxygen than conventional 5mil white on black silage covers.

For ultimate forage quality, we recommend combining Silostop® Clear 2-step Oxygen Barrier film with Silostop® gravelbags.

Using Silostop® results in a reduction of labor requirements and improved feed intake.

Ask about other Silostop® products to protect your forage from birds and help eliminate tires.

“This was the best sealed section of a large bunker I have ever seen in my life!”

**Dr Keith Bolsen,**  
Professor Emeritus  
Kansas State University,  
USA

“Silostop® is the greatest technological advancement since the Kernel Processor! Pull back a layer of Silostop®: see and feel the difference.”

**Bob Headrick,**  
silage contractor,  
Hanford CA
