

## SILOSTOP WALL FILM

**S**ilostop Wall Film ensures you will achieve the ultimate seal and maximum silage protection when used in combination with a Silostop Oxygen Barrier top film. Its thick construction and oxygen barrier properties contribute to high quality silage production. Silostop Wall film protects concrete walls from corrosion by silage acids and prevents the bunker shoulders from aerobic spoilage.

Silopatch

## BENEFITS

Side and shoulder spoilage is virtually eliminated, saving money on labor to remove waste silage.

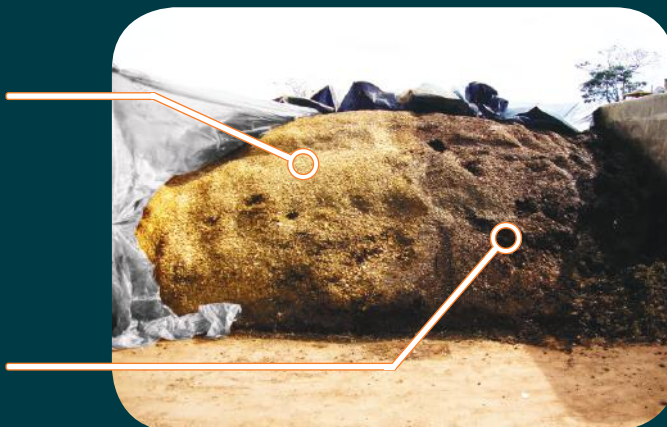

Evidence shows that up to nearly 1 foot of silage can be saved from the edges and shoulders of bunkers.

Silostop Wall Film is strong and durable for improved ease of handling.

Silostop Oxygen Barrier Film has been and is continually independently researched and there are dozens published trials proving that silage DM losses are reduced, aerobic stability is improved and that nutrient levels are preserved at an optimum level.
