## SILOSTOP OPEN NET

**S**ilostop Open Net offers strong, long-lasting protection for Silostop films. Designed with a net structure, Silostop Open Net protects the silage sheeting against physical damage while allowing wind to pass through so that the cover is not lifted. Silostop Open Net should be used for covering Silostop Max.

Open weave structure allows the wind to pass through without lifting the cover

Silostop Open Net should be secured using Silostop Gravel bags
